

CIDBLAST

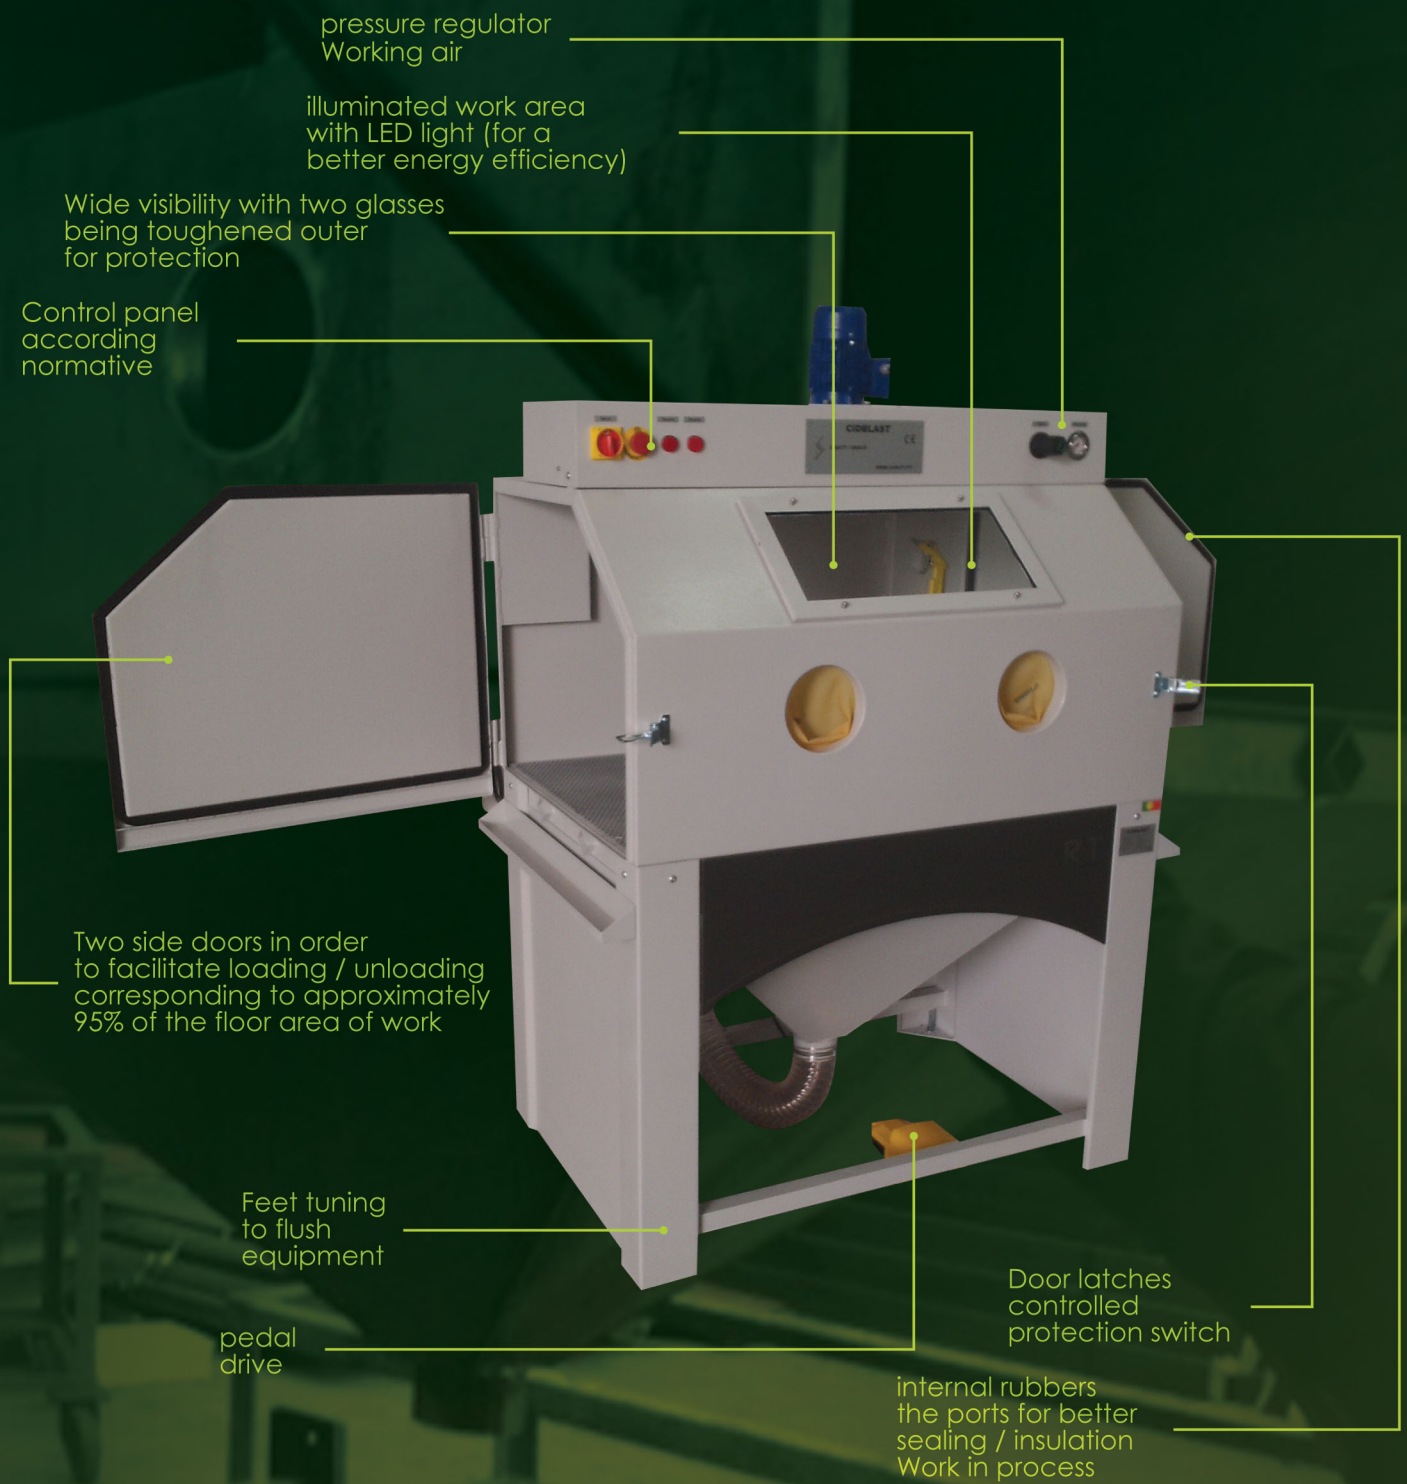

MACHINES AND EQUIPMENTS FOR SANDBLASTING

Cabins manuals (several standard measures models)
Special equipment made according to the needs of
each client.

Innovation and technology in pickling

RT Series

Various Models Available

Models:
RT6 / RT9 / RT12
Various Dimensions

Description:
Two side doors, automatic two filter cartridges,
LED light, with / without cyclone.

Optional: Touch Screen

Various Models Available

Our equipment complies with EC regulations, is also one of our concerns energy efficiency and better utilization of the same. equipment are delivered together with the instruction and maintenance manual and is ready to work on delivery, being necessary to connect the electrical and pneumatic power. Our wide range includes equipment operation with direct pressure or suction characteristics of series, but also operate equipment according to the needs of our clients.

Equipment with cyclone and filter cabinet

Modelo da Cabine	Dimensões úteis da Cabine em mm Largura x Comprimento x Altura	Peso Kg (+/-)
RT 6	600 X 600 X 620	200
RT 9	900 X 600 X 620	285
RT 12	1168 X 600 X 620	430

Equipment closet with filter without cyclone

Modelo da Cabine	Dimensões úteis da Cabine em mm Largura x Comprimento x Altura	Peso Kg (+/-)
RT 6S	600 X 600 X 620	200
RT 9S	900 X 600 X 620	285
RT 12S	1168 X 600 X 620	430

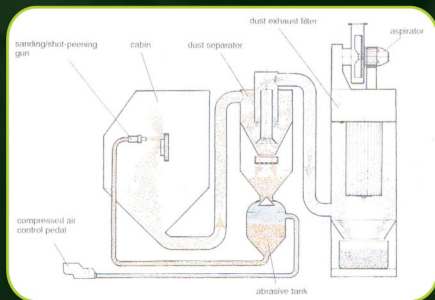

Equipment cabinet with filter, cyclone by direct pressure or suction

Modelo da Cabine	Dimensões úteis da Cabine em mm Largura x Comprimento x Altura	Peso Kg (+/-)
RT 11/XL	1080 X 1000 X 1000	450
RT 14/XL	1420 X 1000 X 1000	680
RT 18/XL	1800 X 1000 X 1000	800

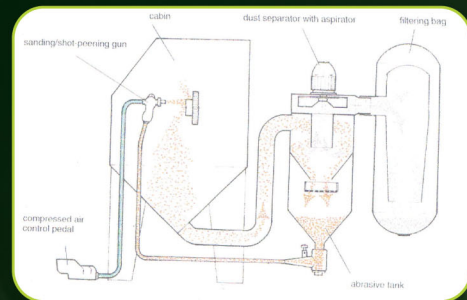

Small parts blasting equipment

Ref.	Designação
RT9-CR	Máquina com ciclone, filtro, cesto rotativo c/inversor
RT12-CR	Máquina com ciclone, filtro, cesto rotativo c/inversor
DIP/24	Dispositivo em pressão

Statement of the principle scheme Operating in direct pressure

Statement of the principle scheme operating in suction / vacuum

Cidblast started its activity in 2010 in the production and development of equipment for blasting / shot blasting, shot peening; during this time several large equipment or small, standard or special, manually operated or automated been marketed, are some examples:

RT6

RT 6S

RT 9CR

Automatic

Automatic

Automatic

Acessories and Components

1. Pressure Cabinet Device; 2. filter cartridges; 3. Cabinet; 4. Filter cartridges; 4. Cyclone; Rotary; 5. Cesto; Rotary; 6. Plate; 7. Fan; 8. Cartridge polyester filter; 9. Bag filter; 10. Blasting Pistol; 11. Short Beak on tungsténio; 12. Beak short on boron carbide; 13. Beak long in tungsténio; 14. Distributor; 15. Pistol suction attachment without spout; 16. Beak boron carbide; 17. Gloves anti-abrasive latex; 18. Pedal electric; 19. Pipe/regulator; 20. Anti-static tube spiral; 21. Tempered Glass series for RT; Normal; 22. Glass series for RT; 23. Hose pickling; 24. Regulator air without monomer.

Pistol developed for optimal labor income may be provided with tips on short or long tungsténio (depending on the work to be performed) all parts are subject to normal wear.

Vacuums and Filters

We have available several measures of filters, fans; they allow you to keep the interior of the cabin in ideal working conditions, ensuring that the air after aspirated and filtered is below 5mg/m³.

Abrasives

We have many abrasives available:

1. Micro glass beads
2. Corindo brown white
3. Corindo
4. Corindo Rec M
5. Esferas ceramics
6. Granalha steel
7. Granalha steel cut wire
8. Granalha iron abrasive
9. Other

Example of some industrial sectors:

Automotive industry, Forging and Casting, Aerospace Industry

Automotive
Boiler
Construction
Tooling
Railroad
Forging and casting
Aerospace industry
Rubber Industry
The Plastic Industry
Medical and surgical industry
Military industry
Nuclear industry
Maintenance
Marble and stone
Mechanization and precision parts
Metallurgical
Molds and dies
Steel
Heat treatment
Manufacture of cutting tools
